

# Digital IP

## Organisational Profile

Digital IP is a Brussels-based company that specializes in the engineering and development of IT solutions. They provide services in a variety of fields including security, marketing and the administration of small to medium sized enterprises. The small yet very productive company was started by two Vesalius Alumni, who believe that an internship is more than just serving coffee or making photocopies. They are looking for creative people who want to take part in exciting projects and be a part of the company's growing success.

In the past six years, Digital's Interns have been involved in broadcasting international sport tournaments, launching new products, analyzing markets for new ideas, deploying solutions on-site, creating marketing tools for the company and designing innovative online services.

Today Digital IP Solutions is very proud of what these interns have achieved and is looking forward to continuing this type of collaboration with undergraduate students.
