## INTERNSHIP PROGRAMME

### DIGITAL IP SOLUTIONS

#### ORGANISATION PROFILE

DIGITAL is a Brussels-based company that specializes in engineering and development of IT solutions in subjects as varied as security, marketing and administrative tasks for small and medium enterprises. This small but very productive company was started by two Vesalius alumni, who believe that an internship is more than just making coffee or doing photocopies. The sponsor is looking for creative people who want to get involved in exciting projects and be a part of the company's success.

In the last four years, Digital's interns have been involved in broadcasting international sport tournaments, launching new products, analysing markets for new ideas, deploying solutions on-site, creating marketing tools for the company and helping the creation of various online services for the company and its customers...

Today Digital IP Solutions is very proud of what these interns have achieved and is looking forward to continuing this type of collaboration with undergraduate students.

#### INTERNSHIP PROFILE

The intern will provide support for the daily operations and will be responsible for:

- Promoting the company through the update or creation of leaflets and/or website;
